1 Choices made in relation to optionality

We encode optionality of positions[1], e.g.

Sidste år skrev jeg   mange breve til dig

(Last year I wrote many letters to you)

  and

Sidste år skrev jeg mange breve

(Last year I wrote many letters)

are coded in the same Construction.

A restriction on the encoding of optionality is given by the PAROLE-model which does not permit to express constraints on the reciprocal order of Positions and on the undissociability of some Positions.   To express such constraints we encode different Constructions.

We only encode real optionality, i.e. all the cases covered by an optional construction must be possible. We do not consider optional those constructions where the presence or the absence of a complement changes the meaning of the verb (often the verb also imposes some restrictions on the type of subject and/or complement occurring in optional and non optional constructions). These cases are covered by different syntactic paradigms. An example is the verb *aftage* (i.a. remove, decrease, take over) which can occur as monovalent or divalent verb, with different meanings and is thus   encoded with two different constructions, a divalent and a monovalent one:

Jeg aftager min faders gamle bil

(I take over my father's old car)

Kurven aftager

(the curve decreases)

** *Jeg aftager*

---

[1] Only optionality in non-elliptical context

2 Syntactic functions

The syntactic functions used for Danish verbal subcategorization frames are the following: SUBJECT, OBJECT, INDIRECTOBJECT, OBLIQUE, ADVERBIAL, SUBJPRED, OBJPRED, REALSUBJ, CLAUSECOMPL. The functions SUBJECT and OBJECT do not need further explanation. SUBJPRED and OBJPRED are used for subject and object predicates respectively. The function INDIRECTOBJECT indicates an indirect object when it is expressed with a prepositional phrase introduced by *til* or by a direct object. Thus in the following two examples both *til hende* and *hende* are assigned the function INDIRECTOBJECT:

> *Jeg giver bogen til hende*
>
> (I give the book to her)
>
> *Jeg giver hende bogen*
>
> (I give her the book)

OBLIQUEs, are prepositional phrases introduced by strongly bound prepositions, such as

> *Jeg tror på Gud*
>
> (I believe in God)

ADVERBIALs are adverbs or prepositional phrases, which (in many cases) can be replaced by an adverb or which are introduced by weakly bound prepositions, such as

> *Jeg tager til London*
>
> (I go to London)
>
> *Han behandler hende godt*
>
> (He treats her well)

ADVERBIALs include measure positions which formally are not adverbs nor prepositional phrases, such as

> *Bogen vejer tre kilo*
>
> (The book weighs three kilos).

The function CLAUSECOMPL is assigned to infinitives subcategorized for by modal verbs, and to deep subject clauses in   Constructions introduced by the expletive *det* (it), e.g.

> *Det angår ikke mig at han er rejst*
>
> (It does not concern me that he has left)

The function REALSUBJ is assigned to deep subjects in Constructions where the formal subject is an expletive.

Der var tre gamle mænd i den gule båd

(There were three old men in the yellow boat)

The function PREPDEPENDENT marks prepositional dependent complements and is not a verbal function, but it is used when describing nested Constructions, e.g.

Jeg glæder mig til det/til at møde dig

(I am looking forward to it/meeting you)

In the above example the prepositional dependent complement is an NP or an infinitive.

3 Framesets

The following phenomena are encoded in framesets:

- dative shift alternation (F_Sdative), e.g.

  Jeg giver hende en bog / jeg giver en bog til hende

  (I give her a book / I give a book to her)

- verbal description with a clausal subject or with a subject expletive *det* and a clausal complement (F_SextCL), e.g.,

  At han rejser angår mig ikke / det angår mig ikke at han rejser

  (That he leaves does not concern me / it does not concern me that he leaves)

- reciprocal alternations

  1. F_Sreciproc1: subject and prepositional phrase introduced by *med* (with) (divalent construction) / two subjects (monovalent construction)

     Jeg mødtes med Poul / Poul og jeg mødtes

     (I met with Poul / Poul and I met)

  2. F_Sfreciproc: subject and prepositional phrase introduced by *med* (with) (divalent reflexive construction) / two subjects (monovalent reflexive construction)

     De har giftet sig /   Hun har giftet sig med ham

     (They married / She   married him)

3. F_Sreciproc2: subject and prepositional phrase introduced by *med* (with)   (trivalent construction) / two subjects (divalent construction)

   Hanne drøftede sagen med Peter / Hanne og Peter drøftede sagen

   (Hanne discussed the matter with Peter / Hanne and Peter discussed the matter)

4. F_Sreciprocobj: object and prepositional phrase introduced by *med* (with)   (trivalent construction) / two objects (divalent construction)

   Han sammenholdte moderens vidneudsagn med faderens / Han sammenholdte de to vidneudsagn

   (He compared   the mother's testimony with the father's / He compared the two testimonies)

- causatives/unaccusatives alternation   (F_Sunac), e.g.

  Jeg lukker døren / Døren lukker

  (I close the door / The door closes)

4 Strategy to Describe Control Information

We encode both coreference and type control, when it is possible to determine it syntactically.

We encode syntactic control distinguishing between control (also called equi) and raising constructions and between subject, object and indirect object control.

Control for verbs is also encoded in prepositional dependent constructions.

In the following some examples of the different type of control constructions are given:

- **subject control**

  Han begyndte med at sortere sine bøger

  (He began by sorting his books)

- **object control**

  Anne tvang hende til at spise kødet

  (Anne forced her to eat the meat)

- **indirect object control**

Han befalede hende at tie stille

(He commanded her to keep silent)

- **raising**

Hun syntes at være glad

(She seemed to be happy)

Also possible restrictions on the subject of subordinate that-clauses are marked, e.g.

Jeg$_i$ bifalder at du$_{not\_i}$ læser

(I approve of you studying)

Here the subject of the subordinate clause must be different from that of the matrix verb.

5 Reflexive Verbs and Reflexive Constructions

We distinguish between verbs with reflexive constructions and reflexive verbs. The former are verbs which can take a non reflexive or a reflexive pronoun in the same "type" of constructions with the same meaning:

e.g.

Jeg vasker mit barn

(I wash my child)

Jeg vasker mig

(I wash myself)

The latter are verbs where the reflexive form has another meaning and/or construction than the non reflexive form, e.g

Jeg brækkede min højre arm

(I broke my right arm)

Jeg brækkede mig

(I vomited)

6 Phrasal Verbs

All phrasal verbs are encoded by special Descriptions whose Self is composed by the verb and the actual particle. Alternations of more particles indicating a direction and following a motion verb are   not considered phrasal verbs, but are encoded as generic positions in Constructions.

> *Lyset gik ud mens vi snakkede.*

> (The light went out while we were talking)

> *Peter gik ud, da han ikke gad høre på Marias klager*.

> (Peter went out, because   he did not want to listen to Maria's complaints)

The first example is thus encoded in a Description of a phrasal verb, the second in a Description where a simple verb is followed by a direction particle.

We do not distinguish between phrasal and prepositional verbs (Allan at al. 1995), because in the PAROLE morphology prepositional particles are not distinguished as a special class.   E.g. the two examples:

> *Han stod på*

> (he   got on)

> *Han stod på bussen*

> (he got on the bus)

are encoded as two different constructions, where the first is a phrasal verb, the second is a divalent verb taking a prepositional phrase as second argument. If prepositional and adverbial particles were distinguished, the two examples could be encoded as a single construction taking as second argument a prepositional phrase having an optional prepositional dependent complement:

> *Han stod på (bussen*)

7   Alternation of Locative and Directional Prepositions or Particles

We encode the alternation of more than two locative or directional prepositions and particles, which a verb can subcategorize for, with a generic adverbial entry. Thus the verb *bo* (live) is subcategorized for a generic adverbial locative prepositional phrase, which covers many different prepositional phrases, such as

Maria bor i Århus/ på en bakke/ ved en sø/oven for din søster/...

(Maria lives in Århus/ on a hill/ near a lake/in front of your sister/...)

8 Description Identifiers

The Description identifiers are used as mnemonics for the types of Description they refer to. Description identifiers for verbs begin with an upper-case "D" (for Description) followed by the letter "v" (stands for verb) and by a digit referring the number of positions in the actual Description (0, 1, 2, 3 or 4 corresponding to avalent, mono- di-, tri- and tetravalent constructions[2].) The following optional lower-case letters "f/m/p/x" indicate that the verb has a special Self (if none of these letters is present the main verb is a simple verb in active form which is the default):

- "f" indicates Descriptions with a reflexive Self (Dv2fN)

- "m" indicates Descriptions with a modal Self (Dv2mis)

- "p" indicates Descriptions with a passive Self . It is used for verbs which in morphology are encoded as belonging to the "main" category, but which can be used syntactically in passive form with active meaning (Dv1p)[3]. They can also mark real passive Descriptions such as Dv3pNiNby. The latter can be recognized because they contain a by-agent ("by").

- "x" marks Descriptions whose Self is a phrasal verb (Dv1x-op).

The combination reflexive phrasal verb can occur in which case the "f" precedes the "x" (Dv1fx-frem).

The Self of a Description takes as default *have* (have) as auxiliary while Descriptions containing a Self with *være* (be) as auxiliary are marked with a final "v", e.g. Dv1 (monovalent for a verb taking *have* as auxiliary) and Dv1v (monovalent for a verb taking *være* as auxiliary).

The remaining letters indicate the types of Positions in a Description. A subject NP is never indicated in a Description-id (default value).

When encoding the verbs we presuppose that all positions are obligatory. If a position is optional we mark it with a "0" after the given position, e.g. Dv2N is a divalent verb with obligatory object, while Dv2N0 is a divalent verb with an optional object.

The only verbal Description which does not contain a Construction is "Dvaux", used for auxiliaries (the Self is marked by an auxiliary feature).

In the following table the different symbols (and some of their combinations) and their respective meaning are shown:

---

[2] Expletives are considered a 0 position.
[3] *Såret heles/heler*
(the wound is healing)

LE-PAROLE   Danish Syntax Lexicon: Costanza Navarretta
           Coding Manual for Verbs   CST
                       printed: juli 14, 2023

Symbols	Elements in Positions
ex	expletive *det* is the formal subject
exder	expletive *der* is the formal subject
N	object NP
indN	indirect object NP
ref N	object NP (reflexive pronoun)
Na	adverbial NP (measure)
i	infinitive
t	that-clause
is	infinitive subject control
io	infinitive object control
iio	infinitive indirect object control
ir	infinitive raising
isni	infinitive subject control with no initial complementizer
w	interrogative-clause
apt	accusative+participle
tnioniw	that-clause/NP+infinitive with object control and no introducer/what-clause[4]
Nis	NP/infinitive subject control
Nir	NP/infinitive raising
Nt	NP/that-clause
Ntapt	NP/that-clause/accusative+participle
Ntis	infinitive subject control

---

[4] Used only for perception verbs.

Ntisapt	NP/that-clause/accusative+participle
Ntir	NP/that-clause/ infinitive raising
Ntw	NP/that-clause/what-clause
Ntwis	NP/that-clause/what-clause/infinitive subject control
Nw	NP/what-clause
Nwis	NP/what-clause/infinitive subject control
CL	subject or CLAUSCOMPL that-clause/infinitive clause
tCL	subject or CLAUSCOMPL that-clause
iCL	subject or CLAUSCOMPL infinitive clause
A	adjectival phrase
ADV	adverbial phrase
ADVP	adverbial phrase/prepositional phrase
P-med	oblique PP (P+NP) introduced by *med*
Pa-til	adverbial PP (P+NP) introduced by *til*
Pis-på	oblique PP (P+infinitive with subject control) introduced by *på*
Pnis-for	oblique PP (NP/infinitive with subject control) introduced by *for*
Pnt-i	oblique PP(P+NP/that-clause with subject control) introduced by *i*
Pntis-om	oblique PP (P+NP/that-c/infinitive with subject control) introduced by *om*
Pntw-om	oblique PP (P+NP/that-clause/what-clause) introduced by *om*
Pnw-om	oblique PP (P+NP/what-clause) introduced by *om*
Pt-for	oblique PP (P+that-clause) introduced by *for*
Pind	indirect object PP (always introduced by *til*)
somN	oblique PP (som+NP)[5]

---

[5] *Som* is encoded as UNIQUE in morphology.

x-ud	phrasal verb with particle *ud*
xP-ud-på	phrasal verb (with particle *ud*) and PP introduced by *på*
spred	subject predicate
aux	auxiliary
PP-fra-til	PP introduced by *fra* followed by PP introduced by *til*

9   Main Types of Verbal Descriptions

The main groups of Description types for verbs are the following:

1. **Description for auxiliaries** :

   Dvaux: *Jeg **har** været der* (I **have** been there)

2. **avalent descriptions**:

   a) auxiliary have - Dv0:   *det sner* (it snows),   Dv0x-ned: *Det pisser ned* (it pissed down),
       Dv0x-op: *Det blæser op* (the wind is raising), Dv0xv-af: *Hen imod aften løjede det af*
       (In the evening   it slackened)

3.   **monovalent   Descriptions**:

   a) taking auxiliary *have* - Dv1:   *jeg lever* (I live)

   b) taking auxiliary *være* - Dv1v: *hun blegnede* (she turned pale)

   c) in passive form with active meaning - Dv1p : *såret heles* (The wound is healing)

   d) reflexive - Dv1f: *vejret har bedret sig siden igår* (the weather has become better
       since yesterday)

   e) phrasal taking auxiliary *have* or *være* - Dv1x-af: *Han takkede af* (he resigned)
       Dv1xv-af: *vinden løjede af* (the wind went down),...[6]

   f) phrasal reflexive (Dv1fx-frem: *han famlede sig frem* (he groped his way), ...)

   g) monovalent with expletive *det* (it) and a prepositional phrase - Dv1exP-med: *det
       vrimler med mennesker* (it is crawling with people),...

---

[6] The dots indicate that the list is not complete.

LE-PAROLE

Danish Syntax Lexicon:
Coding Manual for Verbs

Costanza Navarretta
CST
printed: juli 14, 2023

h) monovalent with expletive *det* (it) and a clause - Dv1extCL: *det nytter ikke at klage/du klager* (complaining does not help), ...

i) monovalent with expletive *der* (there) and a prepositional phrase - Dv1exderNv: *Der kommer en mand med en hvid hat* (A man with a white hat is coming),...

4. **divalent Descriptions**:

a) the 2. position is a nominal direct object - Dv2N: *Jeg har beregnet alle omkostningerne* (I have calculated all the expenses), Dv2N0: *Jeg bremsede (bilen)* (I braked (the car)), Dv2xN-ud: *Han kylede alle de gamle sko ud* (he threw all the old shoes away), ...

b) the 2. position is a nominal object or a clause. If the clause is an infinitive it has subjectcontrol - Dv2Ntis: *Han foregav sygdom/at han var syg/at være syg* (he pretended illness/that he was ill/being ill), Dv2Ntw: *Han angav det/at hun var flyttet/hvornår hun var flyttet* (he denounced it/that she had moved/when she had moved), ...

c) the 2. position is a nominal object or a clause or a nominal object accusative with participle - Dv2Ntapt: *Han krævede et svar/at de gav ham et svar/ spørgsmålet besvaret* (He demanded an answer/that they gave him an answer/ the question answered), ...

d) the 2. position is a clause:

- infinitive with subject control - Dv2is: *Han prøver bilen/at køre* (He tries the car/to drive), Dv2isni: *...og ingen gad høre på hans forklaring* (...and nobody wanted to listen to his explanation), Dv2misni: *Du må ikke have nogen anden gud end mig* (you must not have any other god than me), ...

- infinitive raising - Dv2ir: *Hæren synes at være splittet* (The army seems to be divided))

e) the 2. position is an indirect object -Dv2Pind: *Han ringede til sin mor* (he rang his mother)

f) the 2. position is an adverbial direct object (measure) - Dv2Na: *Hun vejer 57 kilo* (she weighs 57 kilogrammes)

g) the 2. position is an oblique prepositional phrase - Dv2P-efter: *Han fiskede efter et svar* (he fished for an answer), Dv2fP0-for: *Han gemte sig (for hende)* (He hid himself (for her)), Dv2xP0-sammen-til: *Vi skillingede sammen (til en stor gave)* (Vi clubbed together (for a big gift)), Dv2somN: *Hun fungerer som direktør* (she acts as director), ...

h) the 2. position is an oblique prepositional phrase and the prepositional complement can be an NP or a clause. If the clause is an infinitive it has subject control - Dv2Pntis-om: *De argumenterede for deres ide/at de kunne tage afsted/at få lov til at tage afsted* (They argued for their idea/so that they could

LE-PAROLE   Danish Syntax Lexicon: Costanza Navarretta
Coding Manual for Verbs   CST
printed: juli 14, 2023

leave/for permission to leave), Dv2fPnt-over: *Jeg glæder mig over din succes/at du har succes* (I am pleased of your succes/you having success), ...

i) the 2. position is an adverbial prepositional phrase - Dv2Pa-i: *De skal figurere i mit testamente* (they will appear in my will), Dv2Pa-loc: *Han forblev på sit kontor/i sin virksomhed/ved sin mor* (he remained in his office/in his plant/near his mother), ...

j) the 2. position is a subject predicate - Dv2spred: *Han er gammel/skolelærer* (he is old/a teacher), Dv2spredv *Han er blevet gammel/en god skolelærer* (He has become old/ a good teacher)

k) the 2. position is an adverbial phrase - Dv2ADV: *Maden lugter underligt* (the food smells weird)

l) the 2. position is an adverbial or a prepositional phrase - Dv2ADVP: *Han taler højt/med sænket stemme* (he speaks loudly/with a lowered voice)

m) the 2. position is a nominal followed by a nominal or an adjectival apposition -Dv2NNA: *Han bliver kaldt smuk/Peter* (he is called beautiful/Peter)

n) the 2. position is a nominal followed by an adjectival apposition -Dv2NN: *De tykke mørkegrønne blade....var blevet vasket rene...* (the thick dark green leaves ... had been washed clean...)

o) the 2. position is a reflexive pronoun - Dv2refN: *Hun vasker sig* (she washes herself)

p) the formal subject is an expletive, the first position is an NP, the second position is a clause - Dv2exNiCL: *Det påhviler ham at vaske køleskabet* (It is his duty to wash the refrigerator), ...

q) the formal subject is an expletive, the first position is an oblique prepositional phrase, the second position is an infinitive clause with object control Dv2exPioCL: *Det er lykkedes for Sovietunionen at gøre Afganistan til den glemte krig* (URSS succeded in making Afganistan the forgotten war)

r) the second position is a that-clause/NP+infinitive with object control and no introducer/what-clause (perception verbs) - Dv2tnioniw: *Jeg hørte ikke at han kom /ham komme /om han kom* (I did not hear that he came/him come/whether he came)

5. **trivalent Descriptions**:

   a) ditransitive

      - the 3. position is an NP - Dv3indNN: *Jeg giver hende en bog* (I give her a book), ...

- the 3. position is an NP or a clause. When the clause is an infinitive it has indirect object control - Dv3indNNiio: *Han befalede hende tavshed/at tie stille* (he ordered her silence/to be quite), ...

- the 3. position is a clause - Dv3indN0t: *Han svarede (hende) at hun skulle tage afsted* (he answered (her) that she had to leave)

- the 3. position is an adjective - Dv3indNA: *Drømmen forekom hende uvirkelig og fjern* (the dream seemed unreal and far away to her)

b) the 2. position is a direct object and the 3. position is an indirect object prepositional phrase - Dv3N0indP0: *Han hviskede (noget)(til hende)* (he whispered (something) (to her)), ...

c) the 2. position is a direct object and the 3. position is an oblique prepositional phrase:

- the prepositional complement is an NP - Dv3NP-indi: *Han rodede hende ind i sagen* (He involved her in the question), Dv3fNP-af: *Han venter sig et svar af dig* (he is waiting for an answer from you), Dv3xNP-op-med: *Han rørte farsen op med et æg* (he mixed the stuffing with an eg), ...

- the prepositional complement is an infinitive clause with object control - Dv3NPnio-i: *Hanne forhindrede Hans i at begå selmord* (Hanne prevented Hans from committing suicide), ...

- the prepositional complement is a nominal object or a clause. If the clause is infinitive, there can be object, subject or no control at all - Dv3NPio Dv3NPis and Dv3NPi respectively)   (Dv3NPnio-om: *Han bad hende om det/at ringe* (He asked her for it/to ring), Dv3Pnis-med: *Jeg ulejligede ham med mine spørgsmål/at spørge om hjælp hele tiden* (I bothered him with my questions/by asking for help all the time), Dv3xNPnio-af-med: *Hun vænnede børnene af med saften /at drikke saft* (she broke the children of the habit of juice/drinking juice), Dv3Pni-til *Han bevilgede penge til formålet/at bygge en vuggestue* (He granted money to that purpose/to build a kindergarten),...

- the prepositional complement is introduced by the UNIQUE *som* -Dv3NsomN0: *Politiet identificerede ham (som den eftersøgte)* (the police identified him (as the wanted)), ...

d) the 2. position is a direct object and the 3. position is an adverbial prepositional phrase - Dv3NPa-over: *De færgede folket over floden* (they ferried people across the river), Dv3NPa0-fra: *Bilen blev fjernet fra gaden* (the car was removed from the street), ...

e) the 2. position is a direct object and the 3. position is an adverbial phrase
-Dv3NADV0: *Firmaet lønner medarbejdernes værdifulde indsats (godt)* (the
company rewards the staff's valuable work   (well))

f) the 2. position is a direct object and the 3. position is an adverbial phrase or a
prepositional phrase - Dv3NADVP: *Generally henstiller Koranen til, at manden
behandler sin konen ordentligt* (otherwise, the Koran recommends that the man
treats his wife well), ...

g) the 2. position is an adverbial NP (measure) and the 3. position is an oblique
prepositional phrase - Dv3NaP-i: *Han investerede tre millioner kroner i Peters
firma* (he invested three million crowns in Peter's firm), ...

h) the 2. position is an adverbial NP (measure) and the 3. position is an indirect
object   prepositional phrase - Dv3NaPind: *Han udbetalte tre hundrede kroner til
Hanne* (he payed three hundred crowns to Hanne)

i) 2. and the 3. position are oblique prepositional phrases - Dv3P0P0-om-med: *Han
sladrede (om hende)(med vennen)* (He chatted (about her) (with the friend)),
Dv3P0Pntis-med: *De unge kan bidrage (med deres indsats) til freden/at
politikerne stemmer for forslaget/at begrænse volden* (the young can contribute
with their effort to the peace/to make the politicians vote for the proposal/to
reduce violence), ...

j) 2. and the 3. position are adverbial prepositional phrases - Dv3Pa0Pa0: *Han har
tit cyklet(fra København)(til Holte)* (he has often cycled (from Copenhagen) (to
Holte)), ...

k) the 2. position is an indirect object prepositional phrase and the 3. position is an
oblique prepositional phrase - Dv3Pind0P0-over: *Han klagede hele tiden (til
politiet) (over sin nabo)* (he complained all the time (to the police) (over his
neighbour)), ...

l) the 2. position is an indirect object prepositional phrase and the 3. position is an
NP or a clause - Dv3Pindtw: *Du skal sige til Peter at han skal komme/hvornår
han skal komme* (you must tell Peter that he must come/when he must come)).
When the clause is an infinitive we have a raising construction (Dv3indNir:
Pludselig forekom han hende at være uvirkelig (Suddently he seemed unreal to
her)

m) the 2. position is a reflexive pronoun, the 3. position is an oblique prepositional
phrase:

- the prepositional complement is an NP - Dv3NP-i: *Han indhyllede sig i
kappen* (he wrapped in a cloak), ...

- the prepositional complement is an NP or a clause. If the clause is an
infinitive, there is subject control - Dv3refNPnis-med: *Han trøstede sig*

med kagerne/at spise kager (he consoled himself with the cookies/by eating the cookies), ...

n)   the 2. position is a reflexive pronoun, the 3. position is an adverbial prepositional phrase - Dv3refNPa0-fra: *Han fjernede sig (fra mordstedet)* (he went away from the scene of the murder), ...

o)   the 2. position is a reflexive pronoun, the 3. position is an indirect object prepositional phrase - Dv3refNPind0: *Han overgav sig (til fjenden)* (he capitulated (to the enemy))

6.   **tetravalent Descriptions**:

p)   the 2. position is a direct object and the 3. and the 4. positions are adverbial prepositional phrases - Dv4NPa0Pa0-fra-til: *Hun sendte pakken (fra Århus) (til Paris)* (she sent the parcel (from Århus) (to Paris))

q)   the 2. position is a reflexive pronoun, the 3. and the 4. positions are oblique prepositional phrases - Dv4refNPa0Pa0-fra-til: *Hun flyttede sig (fra den hvide stol) (til den sorte skammel)* (she moved (from the white chair) (to the black stool))

r)   the 2. position is an adverbial direct object (measure), the 3. and the 4. positions are oblique prepositional phrases - Dv4Na0P0P0-med-om: *Hun væddede (400 kroner) (med Peter) (om kampens resultat)* (she bet (400 crowns) (with Peter) (on the result of the game))

s)   the 2. position is a indirect object NP, the 3. position is an adverbial direct object (measure), the 4. position is an oblique prepositional phrase - Dv4NNaPnio-for: *Jeg bød ham 3000 kroner for jobbet/at gøre rent* (I offered him 3000 crowns for the job/doing the job)

7.   **passive Descriptions**

Passive descriptions are not encoded with the exception of descriptions for passivization in ditransitive constructions where the subject for the passive construction can be the direct object or the indirect object (e.g. *Han blev befalet at vente* (he was orderd to wait)).

10 Descriptions in the Same Syntactic Unit

Descriptions which are related together by Frame_Sets (section 6.3) are, of course, kept in the same syntactic unit. Other Description types which are encoded in the same syntactic unit are the following:

1. Non reflexive Description with their corresponding reflexive Descriptions (with a reflexive construction) (Dv2refN, Dv2N...) e.g. :

Jeg vasker hende

(I wash my child)

Jeg vasker   mig

(I wash (myself))

2. Descriptions which do not contain an NP subject and the corresponding ones with the expletive *der* (there) as subject and the deep subject NP following after the verb (Dv1v, Dv1exderNv,...):

De to unge   piger kommer

(The two young girls are coming)

Der kommer mange unge girls

(Many young girls are coming)

(lit. There come many young girls)

3. divalent Descriptions with a direct object and the corresponding descriptions with a direct object and an object predicate (Dv2N, Dv2NA):

Han kalder ham for Peter

(He calls him Peter)

Han kalder ham Peter

(He calls him Peter)

4. passive Descriptions are encoded in the same SynU as the corresponding active Description:

   De befalede ham at vente

   (They ordered him to wait)

Han blev befalet at vente

(he was orderd to wait)
